To Mr. Lars ,

I just got back from Russia and there are some little challenges i will like to bring to your notice before the funds vault is delivered, i always made a private inquiries before making delivery for the safety of the vault funds. I have contacted the Swedish airport custom who does the last check before vault funds enter it into your country (Sweden) and the need for vault funds sticker is very important for the funds not to be scanned for content and if scanned the vault funds will be in danger because more proof will be needed and marital photos will be needed for more proof and i believe you don't have.

While going through your funds vault documents i found out that there is no proof of marital photos which happen to be a challenge and the only safe way is to get a back door entry sticker which will be place on the vault for it not to be scanned, that will be a safe entry since the proof of photos are not there to proof your marital status with Dr. Rose M. Peterson who happen to be the rightful owner of the funds as indicates in the documents and it further stated her as your wife.

I will advice you made an application documents for the sticker or you can risk the funds vault without but if anything happen at the airport you will loose the funds vault to the Swedish government who will letter share the funds with the transferring bank British bank, it will not be wise we risk anything at this time that the funds is close to reaching you, let me know your decision (if you want the sticker or risk the vault funds without it by letting me to take it in), it's urgent the vault leaves tomorrow confirm you got this message.

Yours Sincerely

i have to contact the top officer who has promise to grant me the approval but will get back to me tomorrow which means the delivery will be delayed, as for more charges for demur rage you will not pay, i have all that covered for you.
